

## Compton College

May 27, 2021

This report presents the success and retention data across Compton College from spring 2017 to fall 2020 to provide a preliminary view of success before, during, and after the pandemic. The Success Rate is an enrollment that results in an A, B, C, or P (pass) grade compared to all enrollments. The Retention Rate is an enrollment that results in a any grade other than a withdrawal (W).

Spring 2020 presented unique challenges for students related to the pandemic resulting in an abnormally high number of EW grades. Success and Retention rates are provided for spring 2020 with EW grades excluded (dark blue column) and included (light blue) in the denominator to support reflection on these rates over time and the impact of the pandemic. This analysis used data from the California Community College Chancellor’s office Management Information Systems (MIS) referential files and local data files.
