

Math Workshops

SPRING 2014

	Topic	Description
Date: 1/30/14 (Th)	Order of Operations	This workshop will review the order of operations and working with positive and negative integers.
Date: 2/4/14 (Tu)	Fractions	Students will practice finding the GCF and LCD and applying these in the addition, subtraction, multiplication, and division of fractions.
Date: 2/6/14 (Th)	Decimals	This workshop will review the four basic operations of addition, subtraction, multiplication, and division as they apply to decimal numbers. Conversions between the decimal form and the fraction form and percentage will be explored.
Date: 2/11/14 (Tu)	Percentages	This workshop will focus on the three types of percent problems and applications.
Date: 2/13/14 (Th)	Solving Linear Equations	Students will practice solving one-step and multi-step equations.
Date: 2/18/14 (Tu)	Order of Operations	This workshop will review the order of operations and working with positive and negative integers.
Date: 2/20/14 (Th)	Fractions	Students will practice finding the GCF and LCD and applying these in the addition, subtraction, multiplication, and division of fractions.
Date: 2/25/14 (Tu)	Linear Equations Part 1	Students will practice: finding the equation of a line, x-intercepts, y-intercepts and slope both graphically and algebraically.
Date: 2/27/14 (Th)	Linear Equations Part 2	Continuation from previous workshop.

All workshops will be from 2-3PM in G-39 and are free for all ECC-Compton Center students no appointment required.
